

Step 1. Locate the LumaSpec Log.txt file, and right click on it and open up the Properties Menu.

Step 2. Click on the SecurityTab and then click on the edit button.

Step 3. Select each user in the group, and give them full control of the file.

Step 4. Click apply and then close out of the Log Properties window.

Step 5. Repeat this procedure for the LumaSpec folder that the Log.txt file is located in.
