Prior Scientific's vast range of sample holders allow the end user to view almost any sample type, giving great flexibility whilst holding the sample tightly in place, complementing the wide variety of motorised stages on offer.

Our extensive range covers almost all possible sample types, from slides to petri dishes to microtitre plates to metallurgical samples to wafers. In addition, a range of universal sample holders are also available, allowing the end user to use their microscope to view multiple types of sample without the need for multiple holders.

Prior Scientific also has the ability to customise or create sample holders exactly suited to your precise requirements; for more information, please contact us.
