

Conflict minerals sourcing policy

Prior Scientific Instruments Ltd. as a global supplier is aware of our obligations with regards to the laws and regulations related to conflict minerals and specifically the Dodd-Frank Wall Street reform and consumer protection act, section 1502.

The company does not directly source or process conflict minerals, including Tin, Tantalum, Tungsten, or gold referred to as the 3TG. However, 3TG may be contained in our products in the form of solder, or as a component of metal alloys.

Prior Scientific' Instruments Ltd suppliers acquire and use minerals from multiple sources worldwide. We therefore expect our suppliers to comply with the Electronic Industry Citizenship Coalition (EICC) Code of Conduct and conduct their business in alignment with Prior Scientific's supply chain responsibility expectations.

As part of our commitment and reasonable due diligence, we expect our suppliers to have in place policies that will enable us to reasonably assure our customers that products and components supplied to us containing conflict minerals are DRC

(Democratic Republic of Congo) conflict free. If we determine a supplier is failing to cooperate in developing and implementing reasonable or remedial steps then, as a company, we will take appropriate actions.

In support of this policy, Prior Scientific will:

- **Encourage our suppliers to comply with our Conflict minerals sourcing policy.**
- **Where appropriate request suppliers to complete a conflict Minerals Declaration**
- **Collaborate with our suppliers and others on industry-wide solutions to enable products that are DRC conflict free.**
- **Commit to transparency in the implementation of this policy by making available reports on our progress**
